

# Dental Hygiene

A complete home maintenance program designed to prevent dental problems in dogs and cats

## DentaHex™

### Chlorhexidine Oral Care Products

Chlorhexidine in the oral cavity:

- Inhibits plaque accumulation on tooth surfaces
- Decreases the quantity of bacteria in saliva
- Alters the composition of microbial flora
- Binds to oral mucosal surfaces and is released slowly over time

### Oral Rinse

- Chlorhexidine 0.12% with Zinc
- Zinc prevents dead bacteria from mineralizing into calculus and reduces halitosis

### Oral Care Chews for Dogs

- Made with American Beefhide
- Chlorhexidine is incorporated through the chew (longer-lasting, won't dye surfaces)
- Chlorhexidine, along with the natural abrading action of beefhide, remove plaque and prevent the buildup of tartar forming bacteria
- Available in sizes for Large, Medium, Small & Petite breeds

It's estimated more than 80% of all animals over 3 years of age have periodontal disease...yet only 2% of veterinary clients actually go home with any oral care products.

*Incorporating a bag of Enzadent Oral Care Chews as a component of every prophylaxis is a simple and effective way to prevent this from happening in your practice.*

Better Medicine. Better Business.

# Enzadent® Product Group

Contains enzymes naturally found in saliva that generate a flow of OSCN ions (hypothiocyanite) to help safely regulate the microbiological oral ecosystem of pets

## Oral Care Chews for Dogs

- Provide a natural abrading action to help remove plaque and food debris
- Enzymatically treated to help boost dog's own natural defenses found in the saliva
- Formaldehyde is not used during our manufacturing process
- Available in Large, Medium, Small & Petite

## Oral Care Chews for Cats

- Enzymatically treated, freeze-dried fish
- Specially processed to help provide an abrasive texture to help remove plaque and food debris while chewing

## Toothbrush Kit

- Contains one 90g tube of Enzadent Toothpaste, one Enzadent Fingerbrush and one Enzadent Dual-Ended Toothbrush
- Toothpaste does not foam (need not be rinsed) and may be swallowed safely
- Dual-ended toothbrush specifically designed to adapt to small and large tooth surfaces with soft bristles for gentle application
- Components of kit available separately
- Available in Malt and Poultry flavors
